Mr. Donald C. Norseth
Office of State Engineer
442 State Capitol
Salt Lake City, Utah

Dear Mr. Norseth:

I have checked with all the individuals who seemed to know about the Porcupine water and the enclosed sheets show the information as I was able to compile it from my measurements and from the information thus obtained.

Grant White is the Secretary of the Porcupine water users. He has a list of all the rights in the reservoir, but he is in California at this time. He is expected back this week end. I will check further with him as soon as I can contact him.

Will you please send a copy of the corrected elevations of the B. M. posts in the reservoir ^{range} I can then give you the correct acre feet of water in the reservoir each week as I measured them.

Frank Reese.

Also, please give one of the ^{enclosed} copies to Mr.

Very truly yours,

Erwin U. Moser
